

# SILVA FENNICA

a quarterly journal of forest science

**Contents** Vol. 30, 1996

The Finnish Society of Forest Science  
The Finnish Forest Research Institute

**No. 1****Research articles**

- Katarina Lindgren & Dag Lindgren: Germinability of Norway spruce and Scots pine pollen exposed to open air. 3–9
- Markku Lehtelä, Juha-Pekka Hotanen & Pentti Sepponen: Understorey vegetation in fresh and herb-rich upland forests in southwest Lapland. 11–29
- Ilkka Vanha-Majamaa, Eeva-Stiina Tuittila, Tiina Tonteri & Raili Suominen: Seedling establishment after prescribed burning of a clear-cut and a partially cut mesic boreal forest in southern Finland. 31–45
- Jouni Vettenranta: Effect of species composition on economic return in a mixed stand of Norway spruce and Scots pine. 47–60
- Gintautas Mozgeris: Dynamic stratification for estimating pointwise forest characteristics. 61–72

**Research notes**

- Lennart Saari & Matti Nuorteva: Winter ecology of a female White-backed Woodpecker *Dendrocopos leucotos* (Bechstein). 73–76
- Małgorzata Skrzypczyńska: Relationship between *Megastigmus suspectus* Borr. size and *Abies alba* Mill. seed size. 77–80

**Instructions to authors**

81–84

**No. 2–3 Special issue on Climate Change, Biodiversity and Boreal Forest Ecosystems***Part 1 Climate change***Research articles**

- Mika Aurela, Tuomas Laurila & Juha-Pekka Tuovinen: Measurements of O<sub>3</sub>, CO<sub>2</sub> and H<sub>2</sub>O fluxes over a Scots pine stand in eastern Finland by the micrometeorological eddy covariance method. 97–108
- F.G. Hall, P.J. Sellers & D.L. Williams: Initial results from the boreal ecosystem-atmosphere experiment, BOREAS. 109–121
- Virpi Palomäki, Kaisa Laitinen, Toini Holopainen & Seppo Kellomäki: First-year results on the effects of elevated atmospheric CO<sub>2</sub> and O<sub>3</sub> concentrations on needle ultrastructure and gas exchange responses of Scots pine saplings. 123–134
- Oddvar Skre & Knut Nes: Combined effects of elevated winter temperatures and CO<sub>2</sub> on Norway spruce seedlings. 135–143
- Jonathan J. Ruel & Matthew P. Ayres: Variation in temperature responses among populations of *Betula papyrifera*. 145–158

Ilkka Leinonen, Tapani Repo & Heikki Hänninen: Testing of frost hardiness models for <i>Pinus sylvestris</i> in natural conditions and in elevated temperature.	159–168
Tarmo Virtanen, Seppo Neuvonen, Ari Nikula, Martti Varama & Pekka Niemelä: Climate change and the risks of <i>Neodiprion sertifer</i> outbreaks on Scots pine.	169–177
Päivi Lyytikäinen, Pirjo Kainulainen, Anne Nerg, Seppo Neuvonen, Tarmo Virtanen & Jarmo K. Holopainen: Performance of pine sawflies under elevated tropospheric ozone.	179–184
Robert A. Monserud, Nadja M. Tchebakova, Tatyana P. Kolchugina & Olga V. Denissenko: Change in Siberian phytomass predicted for global warming.	185–200
Dina I. Nazimova & N.P. Polikarpov: Forest zones of Siberia as determined by climatic zones and their possible transformation trends under global change.	201–208
Vadim V. Gorshkov, Irene J. Bakkal & Natalie I. Stavrova: Postfire recovery of forest litter in Scots pine forests in two different regions of boreal zone.	209–219
Jouko Silvola & Urpo Ahlholm: Effects of CO <sub>2</sub> concentration on the nutrition of willows ( <i>Salix phylicifolia</i> ) grown at different nutrient levels in organic-rich soil.	221–228
Heikki Hänninen, Ilkka Leinonen, Tapani Repo & Seppo Kellomäki: Overwintering and productivity of Scots pine in a changing climate.	229–237
Egbert Beuker, Marja Kolström & Seppo Kellomäki: Changes in wood production of <i>Picea abies</i> and <i>Pinus sylvestris</i> under a warmer climate: comparison of field measurements and results of a mathematical model.	239–246
Ari Talkkari: Regional predictions concerning the effects of climate change on forests in southern Finland.	247–257
Malle Mandre, Hardi Tullus, Vaike Reisner & Jaan Klõšeiko: Assessment of CO <sub>2</sub> fluxes and effects of possible climate changes on forests in Estonia.	259–268
Anssi Niskanen, Olli Saastamoinen & Tapio Rantala: Economic impacts of carbon sequestration in reforestation: examples from boreal and moist tropical conditions.	269–280
<b>Review articles</b>	
R.A. Fleming: A mechanistic perspective of possible influences of climate change on defoliating insects in North America's boreal forests.	281–294
<b>Discussion papers</b>	
Renaat S.A.R. van Rompaey: Need for integrated policy oriented	295–298

national research programmes: the second phase (1995–2001) of the Dutch National Research Programme on Global Air Pollution and Climate Change NRP.

### *Part 1 Biodiversity*

#### **Research articles**

John C. Brissette: Effects of intensity and frequency of harvesting on abundance, stocking and composition of natural regeneration in the Acadian forest of eastern North America. 301–314

Timo Kuuluvainen, Antti Penttinen, Kari Leinonen & Markku Nygren: Statistical opportunities for comparing stand structural heterogeneity in managed and primeval forests: an example from boreal spruce forest in southern Finland. 315–328

Vadim V. Gorshkov & Irene J. Bakkal: Species richness and structure variations of Scots pine forest communities during the period from 5 to 210 years after fire. 329–340

#### **Review articles**

Anton K. Chtchoukine: North European platyphyllous forests: biodiversity dynamics and climate changes in northwest European Russia. 341–351

Jari Parviainen: Impact of fire on Finnish forest in the past and today. 353–359

Valentin Strakhov & Anatoly Pisarenko: Development and utilization of Russian forest resources. 361–371

#### **Discussion papers**

Jari Parviainen: Tasks of forest biodiversity management and monitoring deriving from international agreements. 373–377

Nigel Dudley, Jean-Paul Jeanrenaud & Adam Markham: Conservation in boreal forests under conditions of climate change. 379–383

## **No. 4**

#### **Research articles**

Tytti Sarjala & Seppo Kaunisto: Effect of different potassium sources on the seasonal variation of potassium and free polyamines in Scots pine needles. 387–398

Reijo Penttilä & Heikki Kotiranta: Short-term effects of prescribed burning on wood-rotting fungi. 399–419

Pekka Punttila & Yrjö Haila: Colonisation of a burned forest by ants in the southern Finnish boreal forest. 421–435

Tord Johansson: Site index curves for European aspen ( <i>Populus tremula</i> L.) growing on forest land of different soils in Sweden.	437–458
Esa-Jussi Viitala: Assessing the effectiveness of non-profit forestry organisations: An ultimate goal approach.	459–476
<b>Research note</b>	
Anne Toppinen, Susanna Laaksonen & Riitta Hänninen: A dynamic forecasting model for the Finnish pulp export price.	477–483

**Submission of Manuscripts** Manuscripts should be submitted in triplicate to Silva Fennica, Unioninkatu 40 A, FIN-00170 Helsinki, Finland. Detailed instructions to authors are printed in the first issue each year, are available from the editorial office, and can be found on Silva Fennica's WWW pages at <http://www.metla.fi/publish/silva/>

**Publication Schedule** Silva Fennica is issued in four numbers per volume.

**Subscriptions and Exchange** Subscriptions and orders for back issues should be addressed to Academic Bookstore, Subscription Services, P.O. Box 23, FIN-00371 Helsinki, Finland, Phone +358 9 121 4430, Fax +358 9 121 4450. Subscription price for 1996 is 300 FIM. The price for subscriptions from Finland is 200 FIM, and these are best addressed to the Finnish Society of Forest Science. Exchange inquiries should be addressed to the Finnish Society of Forest Science, P.O. Box 24 (Unioninkatu 40 B), FIN-00014 University of Helsinki, Finland, Phone +358 9 658 707, Fax +358 9 191 7619, E-mail [sms@helsinki.fi](mailto:sms@helsinki.fi)

**Statement of Publishers** Silva Fennica has been published since 1926 by The Finnish Society of Forest Science. From 1994, the journal is published by the Finnish Society of Forest Science and the Finnish Forest Research Institute. The Finnish Society of Forest Science is a nonprofit organization founded in 1909 to promote forest research. The Finnish Forest Research Institute, founded in 1917, is a research organization financed by the Ministry of Agriculture and Forestry.

**Abstracting** Articles in Silva Fennica are abstracted and indexed in Agrindex, Biological Abstracts, Current Advances in Ecological Sciences, Current Advances in Plant Sciences, Ecological Abstracts, Forest Products Journal, Forestry Abstracts, International Bibliography of Periodical Literature, Life Sciences Collection.
